

Neurointerventional Suite Delivers Life Saving Stroke Care

As a state-designated comprehensive and Joint Commission certified stroke center, Saint Barnabas provides the highest level of stroke care.

In February, the Neurointerventional Suite was dedicated which features biplane technology, a powerful imaging system that provides neurosurgeons multi-dimensional pictures of the brain. When talented physicians and leading-edge technology combine, patients suffering from complex stroke, aneurysm, and other neurovascular disorders receive the best care possible.

Important charitable support helped make biplane technology a reality at Saint Barnabas. The generosity of these supporters gives our Brain Attack Team access to life saving technology to rapidly diagnose and treat complex stroke. It is with deep gratitude that we recognize the individuals and organizations that have helped to transform the care of patients with neurovascular emergencies:

WINTER 2011

Saint Barnabas Receives Generous Gift from the Estate of Martin Brody

Martin Brody,
Saint Barnabas
Trustee,
1977-2009

Longtime Saint Barnabas Trustee Martin Brody, who passed away in 2009, left a generous planned gift to the Medical Center. Mr. Brody and his beloved wife Florence graciously supported Saint Barnabas Medical Center for more than three decades.

Mr. Brody served as Chairman of the Board of Saint Barnabas Corporation and was instrumental in creating an organization that truly transformed health care in New Jersey. According to Mrs. Brody, "Martin always said it was a pleasure to give back."

The Saint Barnabas Medical Center Foundation acknowledges the philanthropic support offered by Mr. and Mrs. Brody and their invaluable gift of time and expertise.

MATTHEW J. MORAHAN, III HEALTH ASSESSMENT CENTER PROMOTES CARDIAC AND CONCUSSION SCREENING FOR YOUNG ATHLETES

Sometimes, the loss of a vital young life results in peace of mind for others. The tragic death of Matthew J. Morahan, III inspired his family, friends, and colleagues to give from the heart in support of Saint Barnabas Medical Center. During his youth, Matthew's talents extended to baseball, football, and swimming and ultimately to his true passion, golf. To ensure young athletes safely enjoy the same experiences Matthew did, the generosity of family and friends helped create the Matthew J. Morahan, III Health Assessment Center for Athletes. At no cost to families, the Center screens children and adolescents for otherwise undetectable brain and heart conditions.

Ninety percent of sudden cardiac deaths in young athletes occur during or after athletic activity; undetected heart conditions are often the cause. Tests to identify potentially serious cardiac problems can prevent sudden cardiac arrest. This is why heart

screening and evaluation are offered through the Matthew J. Morahan, III Health Assessment Center.

The Center also provides ImPACT Concussion Screening for student-athletes between the ages of 12-18. This interactive, non-invasive test assesses memory, reaction time, speed, and concentration. This important information enables physicians to evaluate and treat head injury.

We are deeply grateful to the Morahan family and Matthew's friends and colleagues for their extraordinary generosity. Each and every contribution in memory of this outstanding young man helps us identify young athletes at risk of sudden cardiac death and the serious complications that accompany concussion.

Contact Tori Weinstein at (973) 322-4494 for information about supporting this important program.

4TH ANNUAL PARTY FOR A PURPOSE TO BENEFIT CANCER CENTERS AT SAINT BARNABAS

To honor the nurses and physicians that cared for her husband Vincent, Janet Tedesco conceived Party for a Purpose. This year, the 4th Annual Party for a Purpose will honor Pamela Dennis, well-known women's fashion designer and feature the band the Infernos led by the fabulous Bobby Wells.

Each and every ticket sold will help ensure a compassionate, supportive environment for patients with cancer and their families, an environment that instills hope, strength, and spirit for adults fighting this complex condition. The Cancer Centers at Saint Barnabas treat each patient as an individual to help ease the stress and anxiety that accompany cancer care. Grateful families like the Tedescos enable our team to provide the best care possible.

Party for a Purpose will take place on Thursday, April 7, 2011. An evening of fine food, cocktails, and dancing will be held at Valley Regency in Clifton, NJ. Thanks to Ms. Dennis' generosity, a one-of-a-kind designer dress will surely be the center of attention at the live auction.

Please contact Laura Lark at (973) 322-4331 for information about this wonderful event in support of cancer care.

Fashion Designer Pamela Dennis

Friends of Saint Barnabas – Grassroots Support of World Class Care

Since its inception in 2009, the Friends of Saint Barnabas, a group of dedicated individuals with ties to the Ironbound section of Newark, have actively supported the Medical Center. To date, the group's golf outings raised more than \$65,000 to benefit the Saint Barnabas Breast Center and Emergency Department.

Arthur Pimentel, President, Friends of Saint Barnabas, and Joe Pimentel, Co-Chair, Friends of Saint Barnabas Golf Classic, enjoy the outing with Lynn Lago Marsino of J.H. Cohn, LLP and her husband Jim Simon.

The Friends of Saint Barnabas recently announced their 3rd Annual Golf Classic which will be held at Brooklake Country Club on June 13th. Event proceeds will benefit the Stroke Center at Saint Barnabas which offers comprehensive care for patients that have suffered a complex stroke.

Building on its success, the Friends will hold its first Gala in 2011. Hospital administration and Isabel "Costa" Medeiros will continue to work hand-in-hand with this important group of supporters to enhance services provided at Saint Barnabas.

Cooked and Uncorked Food and Wine Festival is a Delicious Success

Saint Barnabas Burn Foundation teamed with the New Jersey State Firefighter's Mutual Benevolent Association at the 1st Annual Cooked and Uncorked Food and Wine Festival. More than 40 restaurants and over 100 wine and spirits sellers from throughout New Jersey donated their talent and tasty specialties in the name of burn prevention and burn education.

Members of North Hudson Fire and Rescue serve up a delicious dish at the 1st Annual Cooked and Uncorked Food and Wine Festival.

Between gourmet samplings, more than 600 guests watched intently as 10 fire departments competed in the Ultimate Cook-Off Challenge. The cook-off showcased each department's considerable culinary talents with selections ranging from comforting Italian specialties to upscale nouvelle cuisine. The Union Fire Department took home first prize with its wonderful Peppercorn Crusted Braised Short Ribs with Belleville and Hamilton Township taking second and third place.

Cooked and Uncorked would not have been a success without the generosity of its sponsors including Investor's Savings Bank, ShopRite, Allied Beverage Group, and Paul Davis Restoration. Plans are already underway for next year's Festival so stay hungry!

Making a Difference One Child at a Time

At Saint Barnabas Medical Center, our Child Life Department reduces the anxiety, stress, and loneliness of hospitalization. Hospitals like Saint Barnabas have long recognized the importance of Child Life programs which are vital to pediatric well-being. Our Music Therapist, Art Therapist, and Child Life Specialists combine therapeutic play, psychological preparation, education, and emotional support to make hospitalization easier for sick and injured children.

A Child Life Specialist accompanies a young patient to surgery.

Whether receiving inpatient care, outpatient chemotherapy, or prior to surgery, our Child Life team uses play and age-appropriate education to foster coping. As nurses and physicians address each child's medical needs, our Child Life professionals "let kids be kids" despite their medical condition.

Child Life services are especially important for chronically ill children who are frequently admitted for care. The Team establishes close therapeutic relationships with children fighting cancer, kidney disease, sickle cell, and epilepsy. For many of these children, the Child Life Team become surrogate family.

No family is ever charged for Child Life care nor do insurance companies pay for this invaluable service. In 2010, our Art Therapist, Music Therapist, and Child Life Specialists interacted with nearly 3,000 children. Charitable support is the life-blood of our Child Life Program and every donation, no matter its size, directly supports this life-affirming service. We thank the Fred C. Rummel Foundation, the Charles Lafitte Foundation, and donors to the John La Conti, M.D. Child Life Fund for their important support.

To change the life of a child, please visit saintbarnabasfoundation.org and click on the John La Conti, M.D. Child Life video.

The John La Conti, M.D. Child Life Playroom is an oasis of fun for hospitalized children.

EMERGENCY DEPARTMENT FAST TRACK EXPANSION IS COMPLETE

Thanks to the generosity of several donors the Saint Barnabas Emergency Department Fast Track recently underwent a major renovation and expansion. Doubling the size of Fast Track will result in faster triage, registration, and testing for adults and children with a variety of emergency medical needs. This wonderful new facility includes private rooms for stitches and other procedures where added privacy is just what the doctored ordered.

Fast Track prepares to welcome patients.

This important expansion would not have been possible without grant support from The Healthcare Foundation of New Jersey, Chubb Corporation, Emergency Medical Associates, and the community-based group Friends of Saint Barnabas. Each organization recognized the importance of providing timely and expert emergency care to the communities served by Saint Barnabas Medical Center and gave generously in support of enhanced health for all.
